- Membership Cards
- Student Cards
- Health Fund Cards
- Access Cards
- Transport Cards
- Proof of Age Cards
- Drivers' Licenses
- Taxi Driver IDs
- Contractor IDs
- National IDs
- Bureau Services

The feature rich **FoxID32 Pro** allows you to produce **full color photo ID cards** in seconds on any Windows™ compatible printer. The cards can be single or double-sided and can contain photos, text, barcodes and magnetic stripe encoding.

Personnel records can be easily monitored using **FoxID32 Pro**. **Quick-search** functions on any field allow you to quickly find the data you are looking for, while the more powerful **search engine** will search multiple fields to give you all records matching your criteria.

Card and report templates can easily be created using the powerful features of the **FoxID32 Pro card and report editors**. Both standard and custom color palettes can be used to design your own unique ID Cards in a portrait or landscape format.

Default card layouts can be set so that each new record automatically has your most used layout allocated to it to save time.

Images and data can be added or edited easily using the simple capturing options or the **drop down lists** for data entry. **Validation rules** and default values can be set for any field to increase data accuracy.

With **FoxID32 Pro** you can have **multiple databases** with up to **240 user definable** database fields to ensure that your database requirements are met.

FoxID32 Pro supports most common **barcode** formats including the 2-Dimensional PDF417 barcode. Choose data from any of your fields to encode to any track on a **magnetic stripe**.

With the latest in card printing technology, cards can be produced with **holograms**, **watermarks** and **ghosted images** for additional card security. In **FoxID32 Pro**, **WYSIWYG print previews** ensure that all records can be checked for accuracy before printing.

The **FoxID32 Pro** system is ideal for **bureau services**, you can have as many different databases on your system as necessary.

An individual database can be created for each of your clients or departments. Card and report templates can be **interchanged between databases** to maintain uniformity of ID Cards between your clients or departments.

Importing and exporting data and images is easy with **FoxID32 Pro**. The **export wizard** can be used to create templates to make regular data exporting easier.

Full network connectivity is standard in FoxID32 Pro. Any number of licensed operators can use a single or multiple databases simultaneously.

FoxID32 Pro offers you an advanced **audit tracking system**. Each entry into the database has its own history that can only be viewed by a user with permission. The audit trail is fully printable and may be archived, to give management all the information they require. With both a **hardware lock** and a full **login** process, FoxID32 Pro is an incredibly **secure system**.

FoxID32 Pro is so flexible it can be easily configured to any one of five (5) operator modes which can be used for viewing, issuing, capturing, card designing, auditing or any combination of these.

FoxID32 Pro • SYSTEM SPECIFICATIONS

Hardware/Software

- Pentium 200 or greater
- 32Mb RAM (64Mb recommended)
- 1Gb Hard drive
- CD ROM
