# SHIELDED BADGE HOLDER

Secure Badge Holder™

CARD IS PROTECTED WHEN HOLDER IS CLOSED

The patent pending Secure Badge Holder™ is a durable, rigid plastic card holder designed to protect a single contactless PIV, CAC, or identification card.

The Secure Badge Holder is a barrier to the radio frequency signals that are necessary to communicate with smart cards. This offers protection against unauthorized access to valuable information. With no need to remove the contactless smart card, the card is read when the user opens the holder by squeezing the tabs. Information is protected when the holder is closed.

The Secure Badge Holder meets the requirement of FIPS 201 section 2.4 (PIV Privacy Requirements) and 4.4.2 (Biometric Data Representation and Protection) for an electromagnetically opaque sleeve. Shields ISO 14443/15693 and EPC Gen1/Gen2 contactless smart cards.

INSERT CARD IN TOP OF HOLDER

## SOLUTION PACKS

Convenient way to order TEMPbadge ID Products

Pre-packaged kits contain the components necessary for a complete Visitor Management Program for your organization. Solution Packs are available in both manual (badges completed by hand) and printable (badges completed using a direct thermal printer) versions for both office and school environments. Solution Packs come in a rugged box that stores all of these components in separate, easy-to-access compartments... and frees up valuable space on top of your reception desk.

*Best of all... TEMPbadge Solution Packs are a tremendous value over these components purchased separately!*

# TIMEBADGE® EXPIRING BADGE

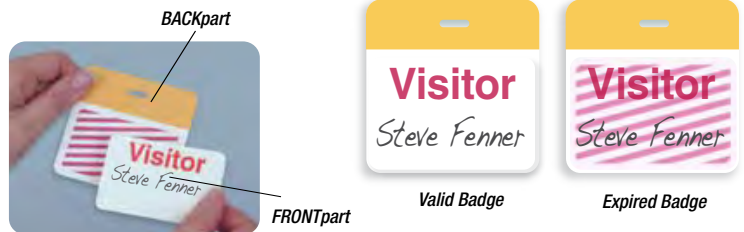

## Expiring Badges

### Manual or Printable TIMEbadge® Expiring Badge

- Patented badges expire gradually, revealing a red color change
- Color change is highly visible from a distance
- Mix and match different BACKparts to color-code different groups of people

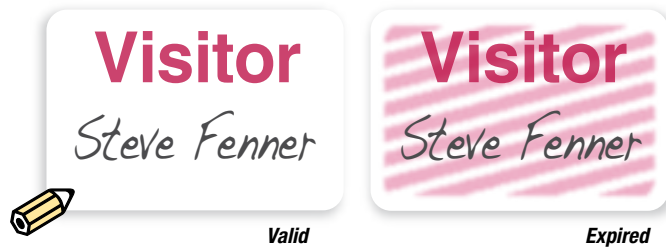

#### How it works: 2-Part Expiring Badge

Place FRONTpart over choice of BACKpart and the expiration process begins and cannot be stopped (Shown with a 3 x 3" (76 x 76 mm) yellow color header BACKpart)

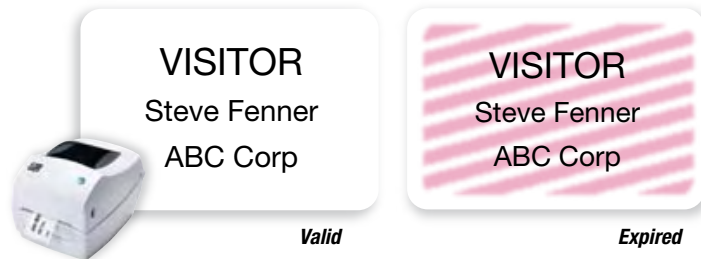

### Manually-Issued TIMEbadge® Expiring Badge

- No hardware or software needed
- Excellent for low to moderate visitor traffic
- Available in 4 expiration time-frames: (Half-Day, One-Day, One-Week and One-Month)

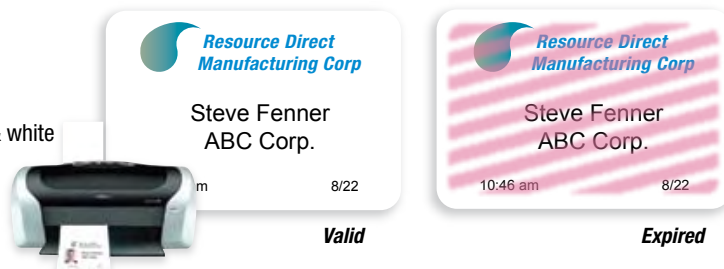

### Thermal-Printable TIMEbadge® Expiring Badge

- Badges print from any direct thermal printer
- Use with your current visitor software system
- Customize your own layout with text or logo
- Available in One-Day or One-Week expiration

### Inkjet or Laser-Printed TIMEjet® Expiring Badge

- Badges print from any inkjet or laser printer
- Quick and easy to use, print quality color or black & white
- Badges come 2-up per sheet
- Available in One-Day Expiration

For added security customize your badges with your organization's logo, colors and/or different headers, such as Contractor, Temporary or Vendor. See page 13-22 for printing minimums.

## PASSAGEPOINT® GLOBAL

### More Features, More Control for Lobby Security

PassagePoint Global is the visitor management solution you can take globally. This powerful and versatile software solution offers the ability to control operations from a centralized location, customize screens and lists, and implement in multiple languages.

**NEW!**

PassagePoint Global also offers integration with:

- IT infrastructure to link to any ODBC or LDAP directory systems
- Create a directory of hosts or single-sign in, integrating with Active Directory
- Microsoft Outlook calendars and vCard software programs

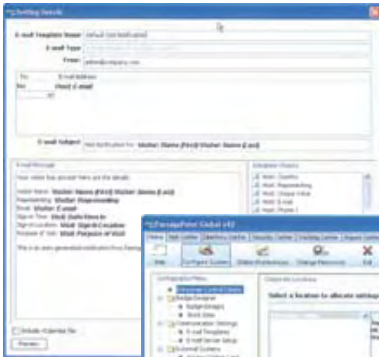

The software is compatible with most major access control manufacturers. Speed up registration with the following:

- Biometric scanners allow repeat visitors to sign-in by scanning their fingerprint
- ID scanner with the ability to send an email with the visitor's photo to the host upon sign-in

**Easy-to-use, Tab Driven  
Visitor Management System**

### Features Include:

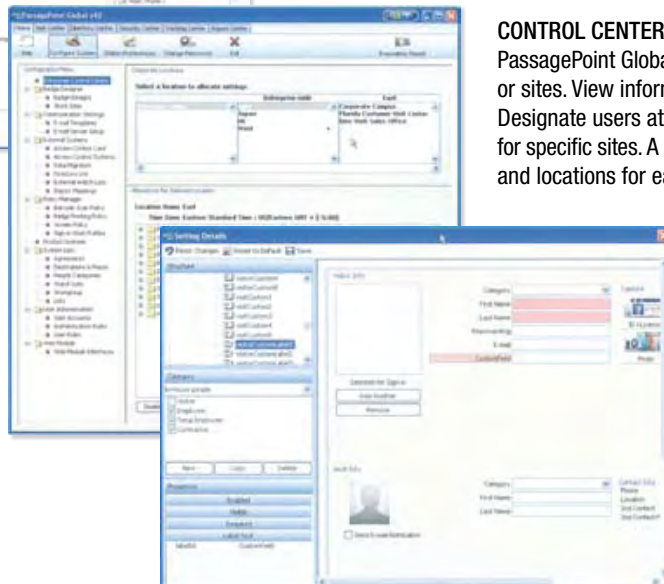

#### VERSATILE EMAIL CAPABILITIES

PassagePoint Global Notifier lets you email user defined categories of people from your email database. Easy to send email to everyone at a specific location - ideal for emergency situations. Email pre-registered visitors so upon their arrival the emailed barcode can be scanned for instant signing in - saving time.

#### CONTROL CENTER

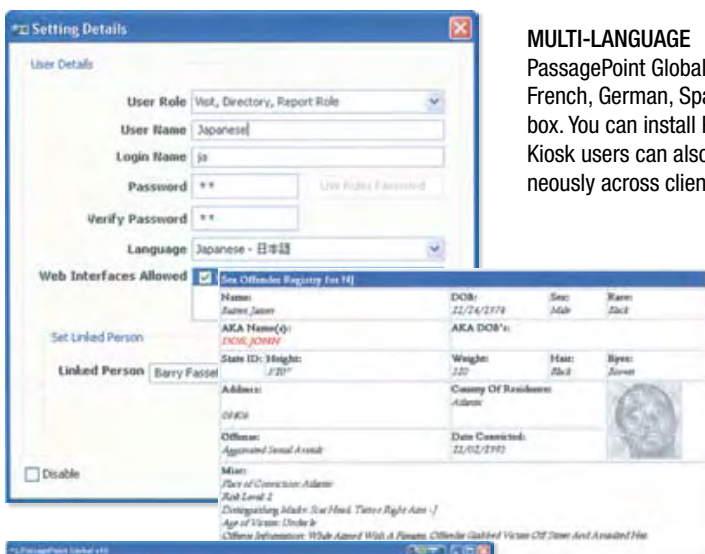

PassagePoint Global Control Center is ideal for multiple buildings or sites. View information that is pertinent to each specific location. Designate users at certain locations and create custom screens for specific sites. A single logical site map lets you track destinations and locations for easy operation.

#### DATA SCREEN CUSTOMIZATION

PassagePoint Global lets you customize any data entry screen by adding custom fields. All these screen features can be configured to dynamically change based on the category of the person.

## PASSAGEPOINT® GLOBAL (continued)

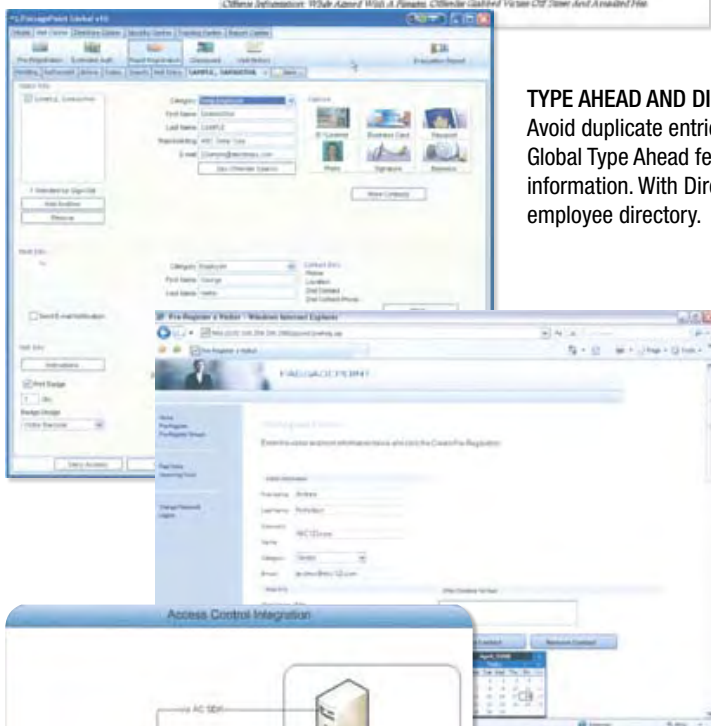

### MULTI-LANGUAGE

PassagePoint Global lets you configure viewing screens in English, Canadian French, German, Spanish, Japanese, Simplified Chinese, and more - out of the box. You can install PassagePoint Server Client in any of these languages as well. Kiosk users can also select the language for sign-in. All languages run simultaneously across clients based on user account settings.

### LIVE BACKGROUND CHECK

When entering a visitor's name or scanning their license, PassagePoint Global can automatically run a background check against a live internet database. If a match is made, you can view the offender's photo, physical description, offenses. Matches can be automatically emailed to your security staff.

### TYPE AHEAD AND DIRECTORY LINKING

Avoid duplicate entries and save time with repeat visitors. With PassagePoint Global Type Ahead feature, name matches as you type with their recorded information. With DirectoryLink add-on, there is a real-time connection to the employee directory.

### WEB PRE-REGISTRATION

Empower every employee to pre-register their visitor with PassagePoint Global Web Pre-Registration module. An E-Visit Pass email can be sent to the visitor and host for instant sign-in at arrival. Each employee can see their upcoming visits and create new visits past history.

### ACCESS CONTROL INTEGRATION

Integrate visitor management with your existing security systems. When a visitor signs in, PassagePoint Global can register the visitor with your Access Control System (ACS) and activate their access rights. A barcode is printed onto their visitor badge to allow the visitor through secure ACS locations. Also works with access cards. PassagePoint Global can activate an unassigned access card and when a visitor signs out the card and barcode it will automatically be deactivated in your ACS.

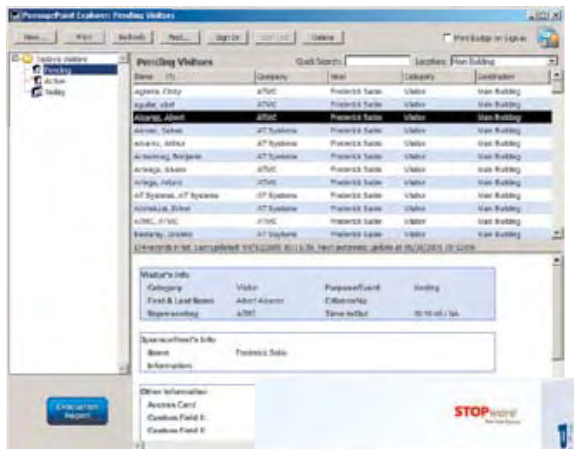

## PASSAGEPOINT® EXPRESS SOFTWARE

All the Necessary Features for Registering and Badging Visitors, Contractors and Temporary Employees

### PassagePoint™ Express Software

No other visitor management product offers such functionality, speed, and ease-of-use. With its impressive upgrade path, PassagePoint Express software is the perfect solution for organizations that need complete visitor management without the extra security features and scalability of PassagePoint Professional and Enterprise software.

### The Explorer Window

The PassagePoint Express software Explorer Window provides a familiar layout of information that users quickly learn without training.

- View a sortable list of pre-registered visitors
- Preview information for each visit and make changes or add additional information
- Create new visits and immediately populate the fields by scanning a business card
- Sign-in visitors and print badges with one click

The Explorer Window provides all the essential information and features in a single, easy-to-use screen.

## PASSAGEPOINT® EDU SOFTWARE

Assure School Safety and Security with Visitor Badging and Management

### PassagePoint™ EDU Software

Educators face many challenges in today's ever-changing education environment. They must assure the safety and security of students and staff by managing visitors, volunteers, temporary employees, parents and suppliers; while complying with security standards and procedures.

PART #	MFR PART #	DESCRIPTION
3935-2102	E-EDU-1	PASSAGEPOINT EDU (1 LICENSE)

3321-1638	ITO-8	FULL DAY ON SITE INSTALLING AND TRAINING
3321-1636	ITR-8	FULL DAY REMOTE INSTALLING AND TRAINING

The solution is offered in PassagePoint EDU, the leading visitor management and badging software. PassagePoint EDU visitor management has been developed for the specific needs of K-12 schools and districts. Now visitors and others are easily signed in and given temporary badges to indicate their presence is authorized. With PassagePoint EDU, school staff can be sure they have accurate information on child custodial issues. Watch lists can be imported to provide on-screen warnings of those who should be denied access to school premises, or to notify staff of VIP visitors. Accurate reports on visitors, volunteers, students and others are now readily available to staff members using PassagePoint EDU.

### IMPROVES SECURITY

- Badge Visitors to show visit is approved
- Import sexual predator lists
- Use Watch List for denying entry, or for identifying VIP visitors
- Check photos to confirm adult ID before releasing a student
- Print temporary badges for students or staff who have forgotten their ID Badges
- Works with TEMPbadge® Self-expiring school badges

## SOFTWARE ADD-ONS & MODULES

### Web Pre-Registration Module

PART #	MFR PART #	DESCRIPTION	LICENSE
3935-1820	M-PR	WEB PRE-REGISTRATION MODULE	1

This advanced system provides pre-registration management of visitors or groups via a web browser. Users can easily enter registration information about expected visitors and later modify and update as needed, specify recurring visits, access levels, and provide special instructions for receptionists. Allows unlimited number of users.

### Access Control Integration Add-on

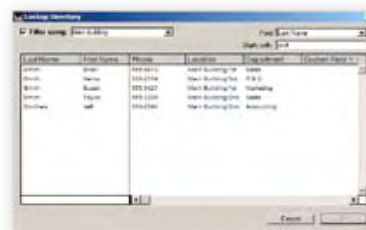

PART #	MFR PART #	DESCRIPTION	LICENSE
3935-1821	A-AC	ACCESS CONTROL INTEGRATION ADD-ON	1

PassagePoint software integrates seamlessly with many of the leading Access Control systems including:

- Software House CCure 800 • Lenel OnGuard • Sielox Pinnacle
- AMAG Access Control • GE Security SecurePerfect
- MDI SafeNet • MAXxess AXxess • and more...

This integrated interface allows real-time activation/de-activation of access system cards and the ability to designate access by date, time, and area. AC Integration makes it safer to provide access to visitors, contractors or employees who lose or forget their cards.

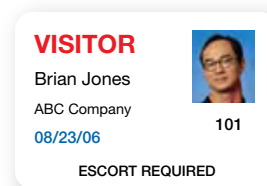

### Directory Link Add-on

PART #	MFR PART #	DESCRIPTION	LICENSE
3935-1822	A-DL	DIRECTORY LINK ADD-ON	1

This add-on links PassagePoint software to any ODBC or LDAP directory system including Microsoft's Active Directory. This allows users to search a central directory of names such as an HR system, Access Control system, or the company's Active Directory. This centralization of data eliminates the need to import directory data and provides the most current up to date information available.

### Photo Capture Add-on

PART #	MFR PART #	DESCRIPTION	LICENSE
3321-1560	A-PC	PHOTO CAPTURE ADD-ON	1

This add-on lets you capture, store, and print visitor photos on badges to increase security and protect against unauthorized use. Photos can be printed in color or black and white depending on the printer used. This add-on is included with the purchase of a license scanner.

## OTHER FEATURES

### Butterfly Pouch

A pouch cut from one piece of plastic and scored so it can be folded to form the pouch. Used with thermal media and Teslin® ID card inserts to make an edge-to-edge card. Call for details.

### Custom Punching

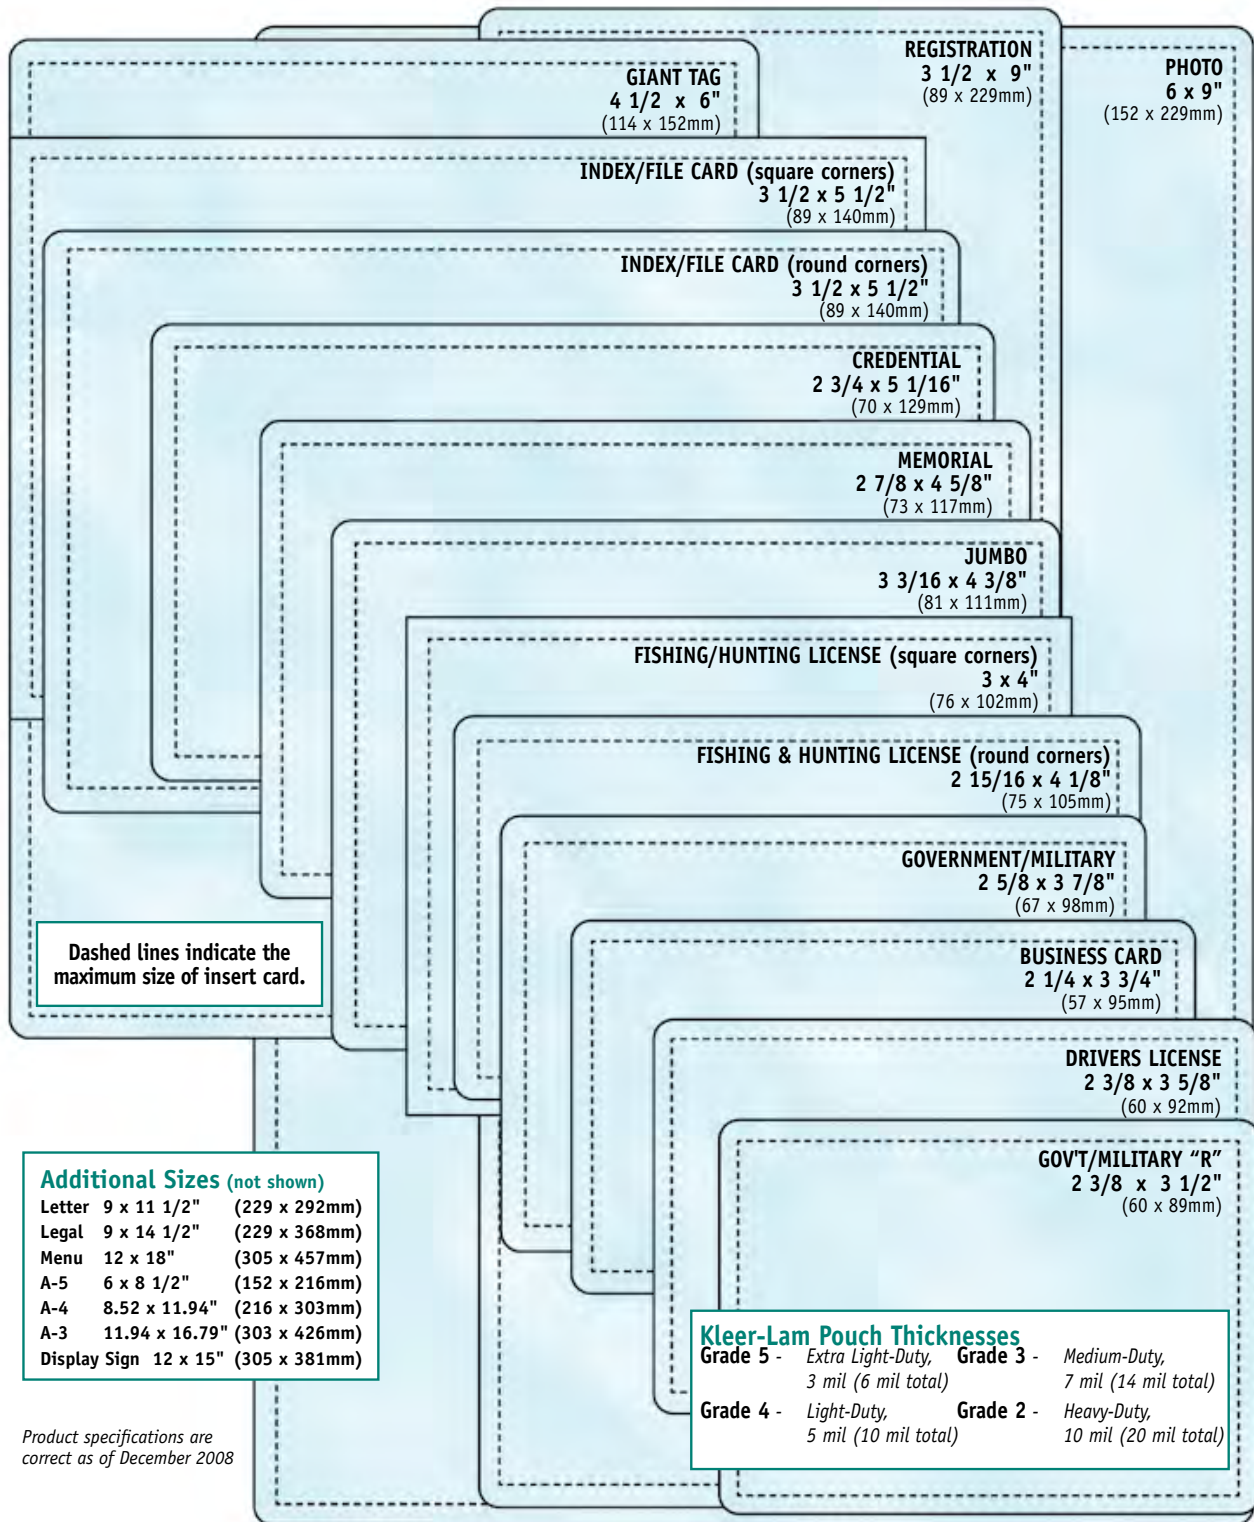

Laminates are available with slot and/or chain holes, and can be pre-punched on either the long or the short side. Call for details.

### Teslin® and Inkjet Sheets

We offer Teslin® and Inkjet sheets in several popular sizes. These perforated sheets utilize the print quality and capabilities of today's laser printers to produce attractive and durable customized badges in the convenience of your office. Perfect for ID cards; membership cards; as well as visitor, temporary, and contractor badges that can be laminated in clear butterfly laminates for long-lasting use. Call for details.

## Other Features and Styles Available

**Butterfly** - A pouch cut from one piece of plastic and scored so it can be folded to form the pouch. Used with thermal media and Teslin® ID card inserts to make an edge-to-edge card.

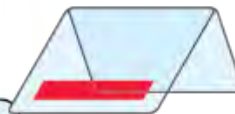

**Pressure-Sensitive** - A thin pouch with adhesive backing. After lamination, release paper is removed from the back of the pouch to expose a sticky surface. Used to adhere photo ID cards to existing access or other "machine-readable" cards.

**Security Coating** - A proprietary coating applied to the surface of the pouch that bonds with the wet surface of an instant-process photo. Attempting to separate the pouch from the film destroys the photo. Used with All-Photo Systems.

**Magnetic Stripe** - A ferric-oxide-coated magnetic stripe stores information in magnetic codes, readable by such devices as access control and other "machine-readable" systems. Available in "High-Coercivity" or "Low-Coercivity".

**Bar Code Mask** - A special opaque covering inside the pouch prevents unauthorized copying of bar codes without affecting readability. Available in solid black (for infrared bar code readers) or red (for visible-light bar code readers).

## Pre-Punching
